OLAMIDE OLANIPEKUN

TECHNICAL PRODUCT MANAGER | PRODUCT STRATEGY, GROWTH & OPERATIONS

Lagos, Nigeria | flux.fx05@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Technical Product Manager with **4+ years of hands-on PM experience** within **7+ years** across product, operations, marketing, growth, community, customer experience, and trading. Translate ambiguous business and user needs into product strategy, requirements, prioritised backlogs, and cross-functional delivery across Web3, fintech, SaaS, and AI. Contributed to **$30M+ swap volume in six months**, a **40%** onboarding/activation improvement, and a **30%** reduction in YNX workflow bottlenecks.

$30M+ swap volume in 6 months	**40%** activation improvement	**30%** YNX workflow bottlenecks reduced	**5K+ / ~50K** communities managed

CORE PRODUCT COMPETENCIES

Discovery & user research | Product strategy & roadmaps | PRDs, user stories & acceptance criteria | RICE / MoSCoW | Agile delivery & backlog | Stakeholder management | Onboarding, activation & retention | Product analytics, SQL & Dune | AI-assisted prototyping | Workflow automation & optimisation

PROFESSIONAL EXPERIENCE

Product Manager | Growth Lead | YNX | Apr 2025 - May 2026

United Kingdom · Remote

Led product development and growth from discovery through launch. Built and owned the YNX community from scratch, then sourced moderators, marketing talent, and developers for operations, growth, and product delivery.

- Built and launched an MVP, managed its lifecycle, and coordinated engineering and cross-functional delivery.
- Sourced marketing talent and developers to support growth initiatives and product delivery.
- Partnered with leadership on product direction, growth strategy, grants, and fundraising; managed sprint planning, backlog priorities, and competitor research.
- Improved operational workflows, reducing bottlenecks by **30%**.

Product Manager | Dextopus | Aug 2025 - Feb 2026

Hybrid

Supported product growth, product operations, and lifecycle optimisation for a fintech platform following launch.

- Optimised onboarding and activation workflows to improve engagement and retention.
- Translated user needs, behavioural data, and operational feedback into prioritised features with product and technical teams.

Product Manager | Team Lead | Debonk Bot | Jun 2025 - Jan 2026

Led product and team execution for Debonk Bot, moving the concept toward an initial product.

- Led 0-to-1 product direction and coordinated delivery with a multidisciplinary team of approximately **eight people**.
- Contributed to onboarding, demo trading, gamification, and the mini-app experience.

Product Manager | Deserialize | Apr 2024 - May 2025

Lagos, Nigeria · Remote

Led product and ecosystem operations for a best-price Web3 swap aggregator that processed **$30M+ in its first six months** (team outcome).

- Coordinated discovery, requirements, prioritisation, and delivery with engineering and stakeholders.
- Used behavioural data and operational feedback to improve onboarding, activation, and retention.

Product Manager & Growth Operations Lead | Limitless Prop Firm | May 2022 - Dec 2023

Led product and growth operations informed by user/community feedback. Built **5,000+ member** Discord/Telegram communities, led a **six-person community team** and a separate **two-person website support team**, and implemented Zendesk with **5–15-minute responses**.

Community Manager | Gotabit | Feb 2021 - Oct 2022

Managed community operations, customer support, content coordination, and engagement, acting as a communication link between users and the technical team.

- Managed community communications, social content, onboarding, and member support.
- Programmed community bots, coordinated technical issues, hosted AMAs and events, and enforced community rules.
- Prepared weekly reports on activity, engagement, feedback, and outstanding issues.

Community Management & Growth Contributor | Betboom | Jan 2020 - Sep 2021

Created and supported Discord and Telegram communities from the ground up for a community of approximately **50,000 members**.

- Created Discord and Telegram communities from scratch for approximately **50,000 members**, handling onboarding, updates, and engagement campaigns.
- Managed member support with typical response times of **5–7 minutes** and surfaced recurring issues and feedback to stakeholders.

SELECTED PRODUCT-BUILDING WORK

FortaFlow | Independent Product Builder

A trading-strategy research and validation product scoped for intermediate retail crypto and forex traders. Led discovery, requirements, UX, architecture, prototyping, and MVP planning. **Build is paused; it is not shipped and has no live-order path.** MVP scope: explicit rules, immutable strategy versions, reproducible historical backtests, performance/risk reporting, bounded stress scenarios, and manual/CSV journaling.

Tools: Notion, ChatGPT, Claude, Google Stitch, Lovable, Claude Code, Supabase, GitHub, Vercel.

AI-Powered Job Discovery & Automation

Built n8n workflows for job discovery, filtering, deduplication, AI relevance scoring, scheduling, and alerts.

Tourist | TS Academy Capstone

Defined a budget-first travel MVP from 19 usable survey responses, documented and prioritised scope, then built and deployed a React/TypeScript prototype. Itinerary drafts use seeded templates, not a live AI model.

TOOLS & TECHNOLOGIES

Jira, Notion, Trello, ClickUp, Mixpanel, Amplitude, SQL, Dune, Figma, Google Stitch, Lovable, Claude Code, ChatGPT, Claude, n8n, Zapier, GitHub, Supabase, Vercel, Discord, Telegram, Zendesk, Slack, Google Workspace.
