OLANIPEKUN OLAMIDE

Technical Product Manager • Growth & Operations

@ flux.fx05@gmail.com linkedin Github

SUMMARY

Results-driven Product Manager with 4+ years of experience leading product strategy, execution, and growth across fintech, SaaS, and Web3 platforms, backed by a total of 7+ years of broader experience spanning operations, marketing, community management, and customer experience. Skilled in Agile methodologies, product discovery, roadmap prioritization, stakeholder management, and data-driven decision-making. Proven to improve onboarding and activation by 40%, reduce operational bottlenecks by 50%, and contribute to products processing over $30M in transaction volume.

EXPERIENCE

Product Manager

YNX | REMOTE

04/2025 - 05/2026 United kingdom - Remote

- Built and launched an MVP, managing the product lifecycle while supporting grant and fundraising efforts.
- Led product execution across digital products, partnering with engineering to move concepts through development and launch.
- Partnered with leadership to shape early-stage growth strategy and support fundraising initiatives.
- Managed sprint planning and backlog prioritization in Notion and Trello, improving delivery coordination across cross-functional teams.
- Conducted market and competitor research to identify scalable opportunities and inform product decisions.
- Reduced workflow bottlenecks and improved operational efficiency by 30% through data-informed process improvements.
- Coordinated delivery across product, operations, and growth teams to keep execution aligned and on schedule.

Product Manager

Deserialise.xyz | REMOTE

04/2024 - 05/2025 Lagos, Nigeria (Remote)

- Led product and ecosystem operations for a Web3 platform that processed over $30M in transaction volume within its first six months.
- Improved onboarding and activation workflows to strengthen user engagement and retention.
- Collaborated with product and engineering teams to prioritize features and support execution planning.
- Reviewed user behavior, operational feedback, and engagement trends to guide product improvements.
- Supported growth and lifecycle initiatives across digital user ecosystems.

Product, Community & Growth Contributor (Contract/Freelance/Full time)

LIMITLESS PROP FIRM | CHAINPEAK GLOBAL | DEBONK | DEXTOPUS BRIDGE...

04/2019 - Present San Francisco, California

- Contributed to the launch of a CRM feature that increased user engagement by 30%.
- Led onboarding, engagement, and growth initiatives across digital communities and product ecosystems.
- Improved retention and engagement workflows, increasing activation rates by 40%.
- Coordinated product campaigns, partnership activations, and ecosystem engagement initiatives.
- Managed influencer outreach, user engagement operations, and community growth initiatives.
- Tracked product performance metrics to identify workflow optimization opportunities and improve operations.
- Collaborated across product, marketing, support, and operations to execute growth-focused initiatives.

KEY ACHIEVEMENTS

Product Leadership & Platform Growth

Led product execution and ecosystem operations for a Web3 platform that processed over **$30M in transaction volume within its first six months**, improving onboarding workflows, supporting feature prioritization, and driving user engagement across the platform.

Product growth and activation

Optimized onboarding and engagement systems across digital platforms, increasing user activation by 40% and improving retention.

Data-informed product improvement

Implemented KPI tracking and user feedback loops to inform product decisions, improve feature adoption, and strengthen the user experience.

Improved product delivery and sprint execution

Reduced feature delivery cycle time by 15% and improved team productivity through stronger backlog prioritization, Agile ceremonies, and stakeholder coordination.

SKILLS AND TOOLS

CORE COMPETENCIES

Product Strategy • Product Vision • Product Discovery • Product Roadmap • Product Operations • Product Lifecycle Management • Agile Project Management • Scrum • Kanban • Sprint Planning • Sprint Retrospectives • Product Backlog Management • Backlog Grooming • Roadmap Prioritization • Feature Prioritization • Product Requirements Documents (PRDs) • User Stories • Requirements Gathering • Stakeholder Management • Cross-functional Collaboration • Customer Discovery • User Journey Mapping • User Research • Product Analytics • Product Metrics • KPI Tracking • OKRs • North Star Metrics • A/B Testing • Experimentation • Go-To-Market Strategy • Release Management • Feature Launch • Workflow Optimization • Workflow Automation • Product Optimization • Data-driven Decision Making • Software Development Lifecycle (SDLC) • Technical Product Management • API Integrations • User Acceptance Testing (UAT) • Wireframing • Prioritization Frameworks (RICE, MoSCoW)

TOOLS AND TECHNOLOGIES

Jira • Notion • Trello • ClickUp • Slack • Monday.com • Typefully • Mixpanel • Amplitude • Asana • Zapier • Zendesk • Figma • Confluence • Discord • Telegram • SQL • AWS

EDUCATION

Mathematics And Education (BscEd)

University of Lagos

Lagos, Nigeria.

PROJECTS

Tourist — AI Travel Companion

TS ACADEMY CAPSTONE | INDEPENDENT PROJECT

End to end: documentation, research, scoping, and code

Live prototype **GitHub**

- Owned the capstone independently, end to end, from problem discovery to a working, deployed prototype.
- Wrote the product documentation hub: vision and strategy, problem validation, research plan, PRD and user stories, MVP scope, prioritisation, roadmap, risk register, QA, and go-to-market plans.
- Ran a 27-question traveller survey (19 usable responses); 68% ranked building a trip around a fixed budget as the most valuable feature, which set a budget-first MVP.
- Scoped the MVP into P0/P1/P2 and broke P0 into a build-ready checklist, deferring safety features to P1.
- Coded the prototype solo in React, TypeScript, and Vite, with 37 test files, and deployed it on Vercel. It runs on sample data; itinerary drafts come from templates, not a live AI model.
